SALCHI METALCOAT

Industrial Coatings and Inks

For Metal Packaging, Coil and Foil

Nice to meet You

We are a dynamic, reliable, technology and customer oriented Italian Company.

We are specialized in the **production of industrial coatings** for:

- **Metal Packaging**
- **Caps & Closures**
- **Aluminum Tubes & Monobloc**
- **Coil & Foil**

Our Company HQ and production plant are based in Northern Italy, but **we provide our customers with our solutions wherever they might need them.**

Coatings for Metal Packaging

Metal packaging is used across food, pharmaceutical, industrial applications, as well as consumer products.

Our coatings help manufacturers meet regulatory requirements while maintaining consistent performance during processing and filling operations.

Food Can Coatings

We supply internal and external coating systems for all kind of two- and three-piece food cans, in compliance with the world's most strict food contact regulations.

Our range includes BPA-NI solutions, repair technologies, liquid and powder side seam stripes, easy-open-ends (EOE) coatings, and electrocoating, and is suitable for any kind of food, including the most aggressive ones.

Caps and Closure Coatings

Our solutions for both food and beverage closures are tailored to our customers' needs and are available for both the interior and exterior of all types of closures.

The range includes solvent and high-solids-based, PVC and BPA-NI solutions, UV coatings, and waterbased coatings for spray application. For exterior coatings, we also offer pigmented systems to match specific colour requirements. The full range is suitable for sterilisation and pasteurisation and is available in any colour and finish.

General Line Coatings

We supply coating systems to meet our customers' food and non-food needs. Our coatings are suitable for pails, closing rings, flanges and plugs.

Our range includes BPA-NI solutions, high solid coatings, UV coatings, repair powders and high-performance, conventional and low-temperature cure, as well as and low-VOC systems.

Aluminium Tubes & Monobloc Aerosol Coatings

Monobloc, aerosol cans and aluminum tubes require the highest standards of flexibility and resistance. To meet these demands, we offer solvent-, water- and UVbased coatings in a variety of finishes.

End-uses include food, pharmaceutical, personal care, household, and industrial products.

Fancy Can Coatings

Our products for Fancy Cans adapt to any type of shape, and provide beauty and colour, as well as the most distinctive tactile effects.

Our range includes different technologies and can be used for any type of metal box, whether for food, cosmetics or chemicals.

Metal Decorating Inks

We offer a complete range of inks suitable for all types of printing, whether conventional, UV or UV-LED. Our solutions can be applied to any type of metal packaging, and are highly resistant to sterilisation and pasteurisation.

The quality of our inks ensures exceptional and durable printing results.

Our Portfolio

Coatings for Sustainability

We believe that each and **every company has a critical role to play in contributing to preserve our world for future generations.** At Salchi, we develop coatings that meet international regulations while reducing environmental and safety impacts without compromising on performance.

Together with our customers, we are committed to pursue a sustainable long-term strategy and **help them become real market differentiators.**

SALCHI METALCOAT Biomoco® SMART SUSTAINABLE COATINGS

BIOMOCO® is our new sustainable coatings range. It is the first step towards a product portfolio that uses sustainable raw materials that are not in competition with the food chain to deliver protection, durability, beauty and value to our customers.

Bio raw materials not in competition with food

Very good adhesion to the substrate

High bio-based solid

SALCHI METALCOAT Salnex® POWERED BY THE SUN

Our **SALNEX® UV/UV-LED products** stem from our customers' need for coating systems with a high dry content, which therefore allow very fast curing.

Curing in no time

High quality and chemical resistance

Space and energy savings

BIOMOCO® Technical Features

Discover our BIOMOCO® Coatings range. We offer various solutions, including water based bio-based enamels, polyester basecoats and overprint varnishes.

- **% Solid:** starting from 45%
- **% BIO on total:** starting from 20%
- **% BIO on solid:** starting from 20%

Rely on our Experts

Customer service stands at the heart of our values. Our customers can always count on our technical experts, to support them in finding the solution that suits their own specific needs.

Because our customers' success is our success.
